A: S01E00 of the Unaired Pilot is available at Hulu now has the Unaired Pilot available in HD for UK users. This episode airs 8th November. S01E00 is the 2nd episode of series 1 of Sherlock. That's why it's missing in the torrent file. To retrieve your episode, visit You'll get prompted to install the Firefox plugin which allows you to watch Hulu. . The measurement was performed using established methods and reported as previous studies. According to previous studies, it is important to perform the measurement under the same conditions when comparing the hard tissue effects of various materials, and the gold foil as a reference was used in the present study. Therefore, it is considered that the results of the present study are reliable. In addition, it has been reported that the correlation of the results of the present study and previous studies was high, and it was verified as satisfying. In this study, when a single-unit wire was fixed with a ligature, the fracture gap was measured, and the intraradicular pressure of each unit was measured. As a result, there was no statistically significant difference in the fracture gap and intraradicular pressure. However, some of the clinical studies in which the fracture gap and intraradicular pressure are measured reported that, in single-unit wires, the fracture gap in the horizontal direction of the tooth was less in the interradericular unit, and the intraradicular pressure was less, compared to a one-third-unit wire \[[@CR8], [9]]. However, in the present study, when the fracture gap of the wire was compared in the interradericular unit, the fracture gap was not significantly different. It was considered that the reason for this is that the unit wire has a special design with the total width of 0.5 mm and a 1 mm portion. In addition, the intraradicular pressure was not significantly different in the present study. It has been reported that there is a difference in the stress distribution to the alveolar bone when performing the ligature with a single-unit wire \[[@CR10]]. It has been reported that the higher the loading is, the more likely the bone resorption is \ 2d92ce491b
